VENDAVAL BRASS

Green rider

How we keep the footprint of each show small, and how you can help.

A LIGHT SHOW TO TOUR

- **No power, no PA, no generator.** The street version is fully acoustic and works under normal street lighting.
- **No technicians, no trucks.** Instruments, clothing and props travel in our own cars, 4 people per car.
- **Local and made to last.** Our sea-creature costumes and props are handmade by Imaginario de Mónica, who shares our co-working space.
- **Reusable games.** Jump ropes, soft throwing objects, a sea net and a lifebuoy. No confetti, balloons or anything thrown away after the show.
- **No printed paper.** Dossiers, riders and photos are online only, at www.VENDAVAL.cat.
- **Concert in the audience:** we use the festival's sound system rather than bringing our own.

WHAT WE ASK OF YOU

- Tap water or water jugs; we bring refillable bottles.
- Vegetarian, local and seasonal food, with no single-use plates or cutlery where possible.
- A dressing room close to the route, so no extra vehicle trips are needed.
- Lodging within walking distance or on public transport.
- Help us link dates: if other venues nearby are interested, we'll share the travel between them.
